

203.5(2) - Enthalpy and Heat Capacity

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	Description	Unit Size	Temperature Range (in K)	Molecular Weight (in g/mol)
705a	Polystyrene	5 g	10 to 350	170,900
720	Sapphire Heat Capacity	15 g	10 to 2250	
781d2	Molybdenum (Heat Capacity)	10 cm	273.15 to 2800
